

Attendees (5):

Jacquelyn Co
Tiana Canja
Dustin Lin
Sasha Kubichka
Sanat Bhandarkar

Objective: (past tense)

In this meeting we discussed what we have worked on since our last meeting.

Agenda:

- Discuss storage allocation
- Discuss work being done on backend
- Discuss CI/CD Pipeline assignment

Information Covered:

- Consider storage space needed for uploading media to website
- CI/CD pipeline, what's been done so far
- Publishing using Github Pages
- What is the status for using the project board
 - Created a few tasks/assigned them
 - TODO: backlog
- Suggest using issues more
- Main thing that will be looked at is project board and issues
 - Needs to be up to date
- Branch strategy seems thought out
- What are you doing if someone makes a pull request
 - Ideally people make a pull request from their feature branch and not automatically merge it in till it's looked at as a group
- Repo people should be looking at pull requests
- This week - front end, next week - back end pages
- End of next week should be proof of concept aka prototype
- Lab this week is weird - take a look at it early
 - Helps show what front end should be
- Most dev work need to happen in the next two weeks
- Will be presenting something next discussion
- Use project board regularly going forward
 - Increases accountability
- What are sub teams looking like right now
 - Developers (back), design (front), dustin is github guru, tiana and jackie planners
 - Paired dev with designers to get work completed cohesively
- Once you are done with review, share outcome with TA
