Attendees (3):
Jacquelyn Co
Tiana Canja
Sanat Bhandarkar

Objective: (past tense)
In this meeting we went over the upcoming assignments, as well as team dynamic.

Agenda:
- Go over anything that has occurred since the last meeting
- "How is everything going between the team"
- Roles/Expectations
- When to meet next
- Any questions

Information Covered:
- Team roles - equality and clarification
- Discuss meeting with TA for clarification with entire team regarding roles
  - Possibly during pitch meeting
- What makes a strong team - we only have 4 weeks to code so we need to be clear
- Assigning team specific roles to aid with planning the rest of the project
- Story points
  - Order by priority
- Planner: map out plan in a timeline going forward (D)
- Designer: figma prototypes, wireframes, etc. decisions for what the user sees
  - Someone creative that has taken initiative (H)
- Dev A, Dev B: identify as developer before anything else
- Builder: responsible for repo, and anything that goes in it. In charge of CI (? - upcoming assignment)
  - Set up pipeline on repo
  - Keep everything up to date
- Github workflows
- Tester: test application, but not unit testing necessarily. Test across multiple levels.
- Make sure developers are testing at the most basic level (at least)
  - Check behavior, inputs, overflow of data types
  - Test driven development - develop test cases as we are writing the code
  - Week 7
- Next meeting:
  - Go over role expectation
